

Solutions for Energy Industry's
Innovation
and Sustainability

A MAZRUI
ENERGY SERVICES
COMPANY

Overview

Established in 1990, Sigma Enterprises is one of the market-leading representatives in the region for energy industry solutions principals. Together with our OEM partners and joint ventures, we provide technical excellence and global expertise across the Middle East with a qualified in-country value certificate. Sigma is also an investor in global technologies and local content solutions.

As part of Sigma Enterprises' continuous portfolio expansion and step-up transformation strategies, besides Oilfield solutions and well equipment we are focusing as well on the digitalization of technologies to improve efficiency in power-generating assets and the introduction of renewable energy transition systems like carbon capture to reduce energy losses.

This is in line with our holding company, Mazrui Energy Services' strategy towards empowering the clean energy transition together with its operating businesses and existing partners. We are very keen to sustain the global initiative to address climate change and to be fully aligned with UAEs strategic objectives to be gas self-sufficient by 2030.

With over three decades of operational excellence, Sigma Enterprises has built a strong reputation for Energy solutions representation and trading.

High Quality

Cost-effective Solutions

Customer Service Excellence

Speed-to-market

Customer Orientation

Operational Excellence

100% Emarati Owned

Trusted Representative for more than 80 Brands

Partner of choice for global & local energy specialists

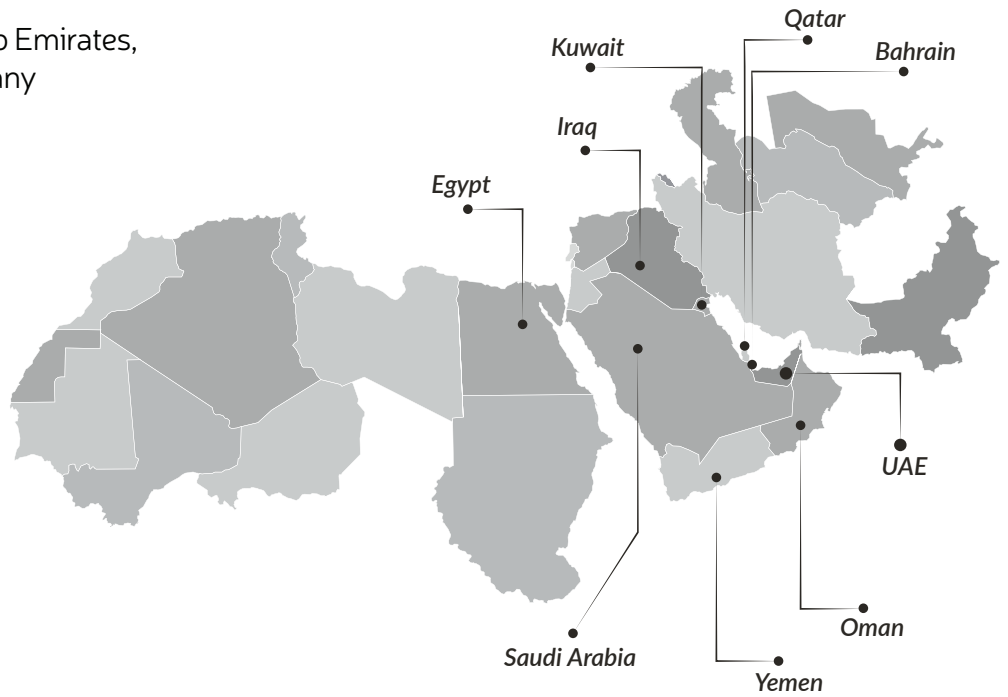

In-Country Value

Technology & Sustainability Partner of Choice

As a result of its strategic location in the United Arab Emirates, Sigma Enterprises Company has a vast service reach throughout the Middles East

● Headquarters ● Operations

Our Value Proposition

As part of Mazuri Energy Services, we are a driving force in the Energy Transition seeking to reduce CO2 emissions whilst, in parallel, working closely with stakeholders involved in clean energy sources, through our innovative solutions for local representation, engineering and technical services, as well as cutting-edge technology.

We give access to our partners to today's market and tomorrow's energy.

Sigma Enterprises has established and implemented a QHSE operational management system that sits at the core of our energy sector business practices as part of its objective to achieve sustainability.

We adhere to international best practices and are diligent when it comes to quality, health, safety, and the environment regulations and procedures.

We place **QUALITY, HEALTH, SAFETY & ENVIRONMENT** at the forefront of our business.

Our Products and Solutions

As a reliable partner that represent over 80 different global brands with various specializations we supply the regional and domestic markets within the following domains:

SOLAR ENERGY

NUCLEAR ENERGY

CO2 REDUCTION

Energy Transition Solutions

Our innovative solutions help energy organization to be a driving forces in the Energy Transition seeking to reduce CO2 emissions and sustainability.

Category	Description	Principals
 Nuclear	<p>From project concept to implementation, we deliver innovative solutions for nuclear energy, including power plants and nuclear research facilities, for Energy Industry EPCs, Operators, and Stakeholders. With the highest standards of health, quality, safety, and the environment, we design solutions for Health Physics, Radiation Protection, and Nuclear Measurement.</p>	
 Emergency Response	<p>Our Advanced Emission Control Solutions ensure compliance with the most recent emissions requirements for energy stakeholders. We're your one-stop shop for cutting-edge DPF cleaning, diesel particulate filter parts, and more, all to help operators protect the environment and meet energy industry protocols and regulations.</p>	
 Emission Control	<p>Our Advanced Energy Response Solutions support Energy Industry organizations and stakeholders mitigate operational hazards and crisis. In addition, they help to create a more safe, sustainable, and environment-friendly</p>	

Leading the Energy Industry Forward

Technology and Digitalization Solutions

Our innovative solution help international and national energy organization access to Digital Transformation and Industry 4.0 for more agile, efficient and sustainable operations for today and tomorrow.

Category	Description	Principals
----------	-------------	------------

Digitalization

Data Science
Digital Science

We offer digital software solutions for drilling and completion operations including machine learning for stuck pipe prediction, digital operating procedures, well-design automation, real-time dynamic monitoring, and integrated drilling automation process.

Conventional Energy Solutions

Our innovative solution help international and national energy organization optimize their conventional energy (oil, gas and petrochemicals) assets and overall operations.

Category	Description	Principals
 <p>Copper Alloy Tubing Tubular Liners Centralizer Buttweld Fittings</p>	<p>Supplying of high quality hot extruded, cold drawn copper alloys products, 6RV / 6RP valves</p>	   <p>شركة صناعة الأنابيب المحدودة ش.م.م Composite Pipes Industry L.L.C</p>
 <p>Diesel Generators Compressor Repairs & Services</p>	<p>Supplying of medium speed engines and generating sets in the power range between 600 and 10400 kW.</p>	  
 <p>Asset Integrity and Corrosion</p>	<p>Detection and monitoring cathodic protection, marine and industrial coating and abrasive blast cleaning and surface treatment equipment supply. Supplier of premium quality of industrial control valves, spray nozzles, injection quills, strainers, filters and forge fittings.</p>	   

Category	Description	Principals
 Engineering and Consulting Services:	Designs and delivers offshore engineering solutions for the global oil and gas industry. We provide Waste Heat Recovery solutions and other engineering solutions such as Instrumentation, SCADA & Telecom, DCS and Integrated Control and Safety System.	   
 Oilfield Services	We offer H2S control treatment & processing, mud cooling, fluid separation and repair and maintenance solutions, we deliver highly effective equipment and services to provide casing and liner solutions, industrial bolting, engine and generator services, rebuilds, servicing and supply both covering the onshore and offshore market, and Offering supply, repair, refurbishment and recertification of rotating and drilling equipment.	       
 NDT (Non-Destructive Testing)	We supply products and technology that promote green energy transition such as energy conversion systems and power solutions.	 
 Metering Systems	Bespoke metering control systems and support for the Oil and Gas sector, working with upstream, midstream and downstream customers.	
 Gas Turbine Services	Qualified to address the extreme operating conditions gas turbine engines experience in the region.	CHROMALLOY ARABIA

Specialty Engineering Solutions

Our innovative solution help international and national energy organizations to have a smooth and reliable day-to-day operations.

Category	Description	Principals
 PPE & Safety Products	Complete range of Personal Protective Equipment for every industry such as fall protection, flame resistant garments, and fire protection systems.	   
 Trading & Consumables	Supplier of consumable products and equipment such as advanced lubricants, premium quality greases and sealants, wireline fluids, valve cleaners, application equipment and seamless butt-welding fittings.	   
 Enclosures Cabinets & Shelters	Glass reinforced polyester enclosures, Kiosks, Battery enclosures, Instrumentation products, Fire and Safety cabinets, Soaker panels, Skylight sheets, Downspouts and Gutters.	
 Marine Services	We offer products and solutions for the maritime industry.	 

Category	Description	Principals
 <p>Oil Spill Emergency Response</p>	<p>Oil spill recovery services, waste management & treatment, soil treatment, water separation treatment works, buffer tanks, mud skips, mud washers, cuttings blower unit, well service pump, and rec. tanker unit.</p>	 
 <p>Rig Equipment & Services</p>	<p>Offers blow preventers, wellheads, sub-sea production, control systems, flowline connection systems, tubing suspension equipment and repair, maintenance, and robust end-to-end rig solutions.</p>	      
 <p>Pumps, Motors & Compressors</p>	<p>Complete range of manufacturing of pumps, motors and compressors.</p>	      
 <p>Snubbing Units Land Rigs Offshore Rigs</p>	<p>Pressure control equipment for snubbing, well-servicing, well control and freeze-hot tapping requirements.</p>	
 <p>Valves Actuators Filtration Connectors</p>	<p>Provider of Electro-Hydraulic Actuators and Hydraulic Control and Systems, high-pressure steel valves, safety relief valves, casing connectors and oilfield tubular accessories.</p>	             

Our Operational Capabilities

Our Warehouse

Sigma Enterprises Company has a spacious 500sqm+ covered storage space for a smooth supply chain process right from receipt, inspection, preservation, and proper storage. We maintain good housekeeping, high-security systems for the safety of men and materials as per Government guidelines and Industrial standards.

We maintain lean inventory management by finalizing long-term contracts with our leading customers to cater to their supply chain requirements.

Our warehouse operation is well-maintained by an integrated ERP system for tracking the movement of each inventory item right from receipt, put-away, picked, packed, and shipped.

Our Logistics

We have a professional Logistics team for planning and delivery of materials on time to meet our customer requirements. We have a fleet of company-owned pickups and trucks for quick delivery of goods and services and have call of agreements with a leading logistics company for all types of trucks and special vehicles for fast-track movement of all equipment as per customer requirements.
